

Mass Immunization Module

What is Mass Immunization Module

Mass Immunization Module (MIM) is a part of the Children and Hoosiers Immunization Registry Program (CHIRP). It is designed to allow for quick entry of hundreds of patients who receive one or two vaccinations at one location. It is not intended to replace CHIRP, but to facilitate the quick entry of data during a mass immunization event.

Who can have access to MIM

- You must be a CHIRP user with basic understanding of CHIRP
- You must have need to access MIM due to a planned mass immunization event or administration of Novel H1N1
- Call the helpdesk and ask for Dusty Quick or Cameron Minich. Watch online for additional information.

Current Approved MIM Events

- School clinics (Tdap and MCV4 vaccine only)
- Flu clinics (both school and non-school)(seasonal flu only)
- Novel H1N1 flu clinics (H1N1 vaccine only)
